

FRP Adhesive

The *fastest working* wall panel adhesive on *Earth*.

Use for
more than
just FRP!

Acrovyn • Koroseal • Kydex • FRP • NRP • Rigid panels
LVT & sheet vinyl on walls • Recycled rubber up to 8 mm thick

FRP Adhesive has the market's longest working-time!

- Crew spends less time on the job site
- Spray the entire wall without spraying adhesive on the individual panels
- No handling of panels with heavy and sticky adhesive on back
- Works over porous & non-porous substrates
- No sagging of panels
- Water-based formula
- 4+ hours working-time (longest on market!)
- Shelf life is 3 years (opened or unopened)

BREAKDOWN OF AN INSTALLATION

Project area = 31,000 ft²

Spray-Lock's FRP Adhesive

74 CASES = 444 CANS (22 OZ/EA)

TOTAL WEIGHT: 814 lb

A huge reduction of **4,657 lb**
in product weight to ship.
Aluminum cans recycled.

vs

Trowel-On Competition

125 PAILS (3.5 GAL/EA)

TOTAL WEIGHT: 5,471 lb

High shipping costs.
Plus, once empty these
pails would have ended
up in the landfill.

ADHERES TO: Nearly ALL smooth, flat, and clean substrates; porous & non-porous: drywall, plywood, backer board, existing ceramic tile, existing FRP panels, plexiglass and more!

Wainscoting as seen in a
hospital hallway setting

Spray-Lock's FRP Adhesive is the best option for installers looking for the fastest-working spray adhesive with the longest working-time on the market.

Instead of constantly applying adhesive to the back of panels which adds weight to each panel, installers can spray out the work area and immediately focus on sheet installation. FRP Adhesive's instant shear strength eliminates sagging panels, thus saving valuable time.

Offering a low profile that adheres to both porous and non-porous surfaces, **FRP Adhesive is versatile for nearly all types of panels and substrates.**

FRP Adhesive

REAL RESULTS

Since 2014, Spray-Lock's FRP Adhesive has been the **sole spec for LVT wall application in Wendy's** restaurants. It's also been used in IHOP restaurants.

FRP Adhesive isn't only for commercial use! Take your **home rec room to the next level with LVT on the walls** while also protecting the sheetrock from stray darts.

A single can of FRP Adhesive will **cover two panels sized 8'x4'**. That's 70 ft² of coverage in each aluminum can!

Spray-Lock's FRP Adhesive has been used to install over **12 million ft² of wall panels in Walmart** stores and over **26 million ft²** of installs nationwide.

The adhesive's low profile allows panels to sit flush with the wall
